Professional Profile

A recent Bachelor of ICT (Software Technology) graduate from Swinburne University with solid foundations in troubleshooting, system analysis, and full stack development. I also have hands-on exposure to cloud-native services on AWS and Microsoft Azure.

I've built personal projects across frontend and backend, applying basic Python/SQL data analytics to support problem solving. I also use AI-assisted tools like Cursor and Claude Code to enhance debugging and code quality. Curious, collaborative, and eager to learn. I enjoy Agile environments that value innovation and mentorship. As an Australian citizen based in Melbourne, I'm available immediately and open to relocation.

Technical Skills

- **Full Stack & Web Development:** C#, ASP.NET Core Minimal API, Node.js, Express.js, GraphQL, RESTful APIs, TypeScript, React.js, Next.js, Redux, MVC patterns, responsive web platforms.
- **Databases & Integrations:** SQL Server, PostgreSQL, MySQL, schema design, query optimization, API integrations, CRM and third-party systems.
- **Cloud & Architecture:** Azure (Functions, Container Apps, Storages), AWS (Lambda, EC2, S3, CloudFront, API Gateway, CloudWatch), GCP (Cloud Run, Cloud Functions, BigQuery, Cloud Storage, Cloud Build).
- **DevOps, Automation & Quality:** Git, GitHub Actions, Terraform, Docker, CI/CD pipelines, environment configuration, automated deployments, unit/integration testing, log driven debugging, and secure, maintainable code practices.
- **AI Assisted Development:** Using Cursor and Claude Code to accelerate development and code quality.

Experience

Multi-Store E-Commerce Platform: Full-Stack – **Azure** – Live demo available upon request

- GitHub: https://github.com/thangtruong1808/multi-store-ecommerce-platform

- Developed backend APIs and features using .NET 8 (C#) and PostgreSQL for multi-store catalog, RBAC, orders, invoicing and Stripe integrations.
- Implemented Terraform based IaC and automated deployments (GitHub Actions, GHCR), improving stability by resolving integration issues and validating behaviors across environments.

Chibi Badminton · Full-Stack - Railway – Live Demo

- GitHub: https://github.com/thangtruong1808/badmintonwebsite
- Frontend: React 18, TypeScript, Vite, Tailwind CSS, Redux Toolkit, React Router
- Backend: Node.js, Express.js, TypeScript, MySQL, JWT, Zod: dynamic reward points (pools, incentives, clawback)
- Integrations: Stripe (Checkout, Webhooks, Refunds), Cloudinary and deployment on Railway platform

---

Professional Roles

- **Student Mentor Swinburne Online | July 2022 – May 2025**

Selected as a mentor to support new online students in navigating Canvas, understanding academic integrity, and staying on track with weekly study tasks, while providing practical guidance and study strategies.

- **Transport Palletizer: ALDI Distribution Warehouse (Oct-2016 to March 2025)**

I operated palletizing machinery, managed stock movements, and supported trailer loading in a fast-paced environment, consistently maintaining strong safety, accuracy, and teamwork.

- **Software Developer/Tester at GCS, HCM City, Vietnam | May 2004 – July 2007**

Built and maintained PHP/JavaScript web apps, performed functional and regression testing, and supported troubleshooting to keep releases stable and on schedule.

Education

- **Master of Applied Artificial Intelligence** – Deakin University | Part-time study | June-2026 - Present
- **Bachelor of ICT** from Swinburne University of Technology, Melbourne | Nov 2020 – Feb 2025
- **Bachelor of Hospitality Management** from Box Hill Institute, Melbourne | 2008 – 2012
- **Higher Diploma in Software Engineering** from Aptech Worldwide in Vietnam (2002 – 2005)
